Power Supply

P200 Panel Light supports three power supply modes.

- **DC power supply**: You can use the standard power adapter (18W) or choose 5V⎓3A / 9V⎓2A / 12V⎓1.5A power connection.
- **Lithium battery power supply**: This product supports NP-F series lithium battery, lithium battery needs to be provided by yourself.

Installation method: Place a NP-F lithium battery in the lithium battery slot of the host. Align the socket end of the lithium battery with the positive and negative contacts in the slot, push down and clamp it tightly to complete the installation.
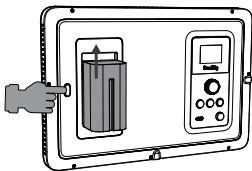

①   ②

Removal method: Press and hold the button of the battery compartment, push the lithium battery upwards, so that the lithium battery is separated from the positive and negative contacts, and the lithium battery can be taken out.

- **Power bank**: This product supports a power bank that can output USB-C 5V⎓3A / 9V⎓2A / 12V⎓1.5A.

Notice

1. This product does not contain a built-in battery, and cannot charge an external NP-F lithium battery.
2. The screen can display the remaining power of the external NP-F lithium battery, but due to the uneven quality of lithium batteries on the market, there will be a certain proportion of deviation between the power display and the actual remaining power of the battery, please understand.
3. Due to the small battery capacity of the NP-F550, when the product is working at full power, the NP-F550 will automatically enter the protection state and stop working. Please turn down the brightness to use it normally.

Product Instructions

Power ON / OFF

- Connect the standard power adapter to the power supply (or use NP-F series lithium battery for power supply).
- Press the Power Switch, the button will be self-locked, and the product will be turned on.
